## Professional Summary

Full-Stack Developer with 1+ year of experience building scalable web applications using React.js, Node.js, and MySQL. Delivered 4 production-grade applications serving 1,000+ users, integrating AI-powered workflows, semantic search, and speech processing systems. Experienced in end-to-end product development including frontend architecture, REST API design, database optimization, and VPS deployment.

## Technical Skills

**Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, Component-Based Architecture

**Backend:** Node.js, Express.js, RESTful API Development, Authentication

**Databases:** MySQL, MongoDB, Vector Databases, Query Optimization

**AI Integration:** LLM APIs, Embeddings, Semantic Search, Deepgram (STT/TTS)

**DevOps & Tools:** Git, GitHub, PM2, VPS Deployment, Postman

## Professional Experience

### QuantumHash Corporation

April 2024 – Present

Full-Stack Developer

Remote

- Built and deployed 4 full-stack production applications serving 1,000+ users.
- Developed 50+ RESTful API endpoints using Node.js and Express.js for scalable backend architecture.
- Designed 40+ reusable React components improving frontend development speed by 30%.
- Optimized MySQL queries and indexing strategies improving database performance by 35%.
- Reduced average API response time from 800ms to under 450ms through backend restructuring.
- Integrated LLM APIs and vector embeddings handling 10,000+ AI-driven requests.
- Managed VPS deployments using PM2 ensuring stable production releases with minimal downtime.

## Projects

### QhashAI – AI Conversational Platform

React.js, Node.js, MySQL, Vector DB, RAG

- Architected and developed a production-ready AI conversational platform handling 5,000+ AI queries.
- Built an end-to-end Retrieval-Augmented Generation (RAG) pipeline integrating vector embeddings, semantic search, document chunking, indexing, and contextual retrieval.
- Engineered a semantic search engine capable of retrieving highly relevant information from large-scale knowledge bases with low-latency responses.
- Implemented vector databases and embedding-based similarity search to improve retrieval precision and contextual accuracy.
- Optimized AI retrieval workflows, reducing response latency while improving answer quality and knowledge grounding.

### OfficeMoM – AI Meeting Automation Platform

React.js, Node.js, Deepgram, LLM APIs

- Built AI-based meeting platform processing audio sessions up to 2 hours in duration.
- Integrated speech-to-text pipeline achieving 90% transcription accuracy.
- Automated structured Minutes of Meeting generation reducing manual effort by 70%.
- Designed secure APIs for storing, retrieving, and analyzing meeting insights.

### AI-Based Online Assessment System

React.js, Node.js, LLM APIs

- Developed scalable assessment system supporting concurrent user sessions.
- Implemented secure backend APIs for test creation, execution, and automated scoring.
- Applied embeddings to improve semantic relevance of generated assessment questions.

### QuantumEdu – AI E-Learning Platform

React.js, Node.js, MySQL, LLM APIs

- Developed AI-powered e-learning platform for students from Class 5–12.
- Built intelligent tutoring system where AI teaches students like a personal tutor.
- Implemented AI-generated explanations, doubt solving, and personalized learning workflows.
- Designed scalable backend APIs for student progress tracking and content delivery.

## Education

### Tara Devi Harakchand Kankaria Jain College

2020 – 2023

Bachelor of Science in Computer Science

Kolkata, India
